

Money Generator Machine

These are the instructions on how to use the software. The **concept** of the software is to find clients that require digital services online from sites like Craigslist. The type of digital services are like Graphic design, online marketing, SEO, Social media marketing, web design, etc. If you cannot perform any of the services then there is no need to worry because all you need to do is outsource the work to freelancers that will do the job for you at a cheap rate.

So if a client needs a logo design, you can charge the client as much as you like but it should be a reasonable price. So let's say you charged your customer \$50 for a company logo if you cannot design the logo then the software will direct you to freelancers that can do this type of service for \$5 and then your profit from the rest of the money you charged the customer. So by playing the middle man, you still make a profit out of the transaction.

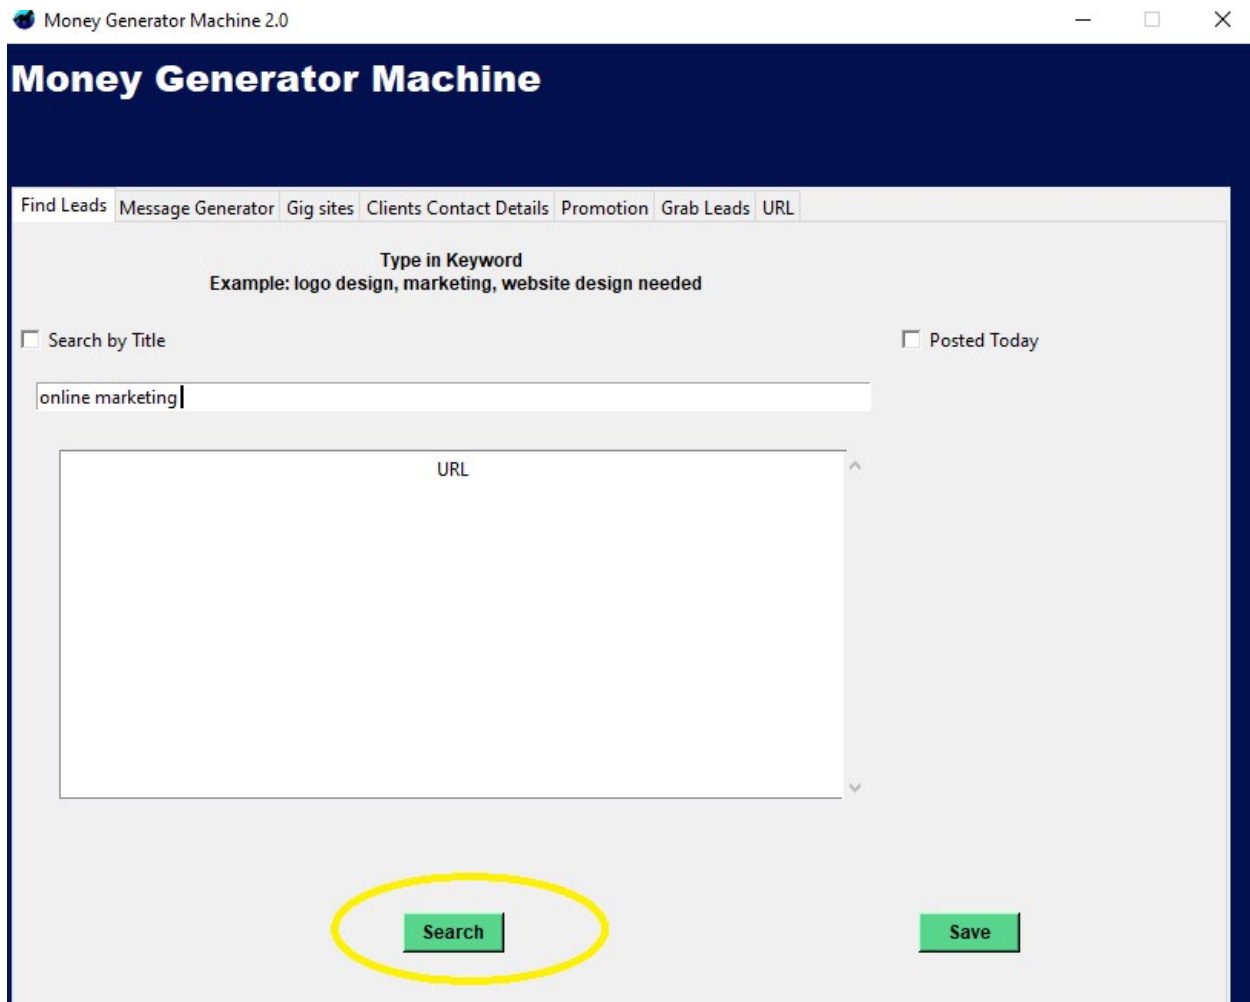

The Software also has other features on how to make money online.

To start the software just double click on the .exe file to open the application.

The screenshot shows the 'Money Generator Machine 2.0' application window. The title bar includes the application name and standard window controls. The main interface has a dark blue header with the title 'Money Generator Machine'. Below the header is a tabbed interface with the following tabs: 'Find Leads', 'Message Generator', 'Gig sites', 'Clients Contact Details', 'Promotion', 'Grab Leads', and 'URL'. The 'Find Leads' tab is currently selected. Inside this tab, there is a section titled 'Type in Keyword' with an example: 'Example: logo design, marketing, website design needed'. Below this, there are two checkboxes: 'Search by Title' and 'Posted Today'. A text input field is positioned below the checkboxes. A large, empty rectangular box labeled 'URL' is located below the input field. At the bottom of the interface, there are two green buttons: 'Search' and 'Save'.

Here you will find different tabs and buttons to perform different tasks.

In the first tab you can search for leads to perform services for them. All you need to do is type in your keyword or phrase in the top field then click the **Search** button to search for the leads. You can also save your results to a text file by pressing the **Save** button.

You also have the option to search for leads that posted ads on the same day of your search by checking the **Posted Today** check box.

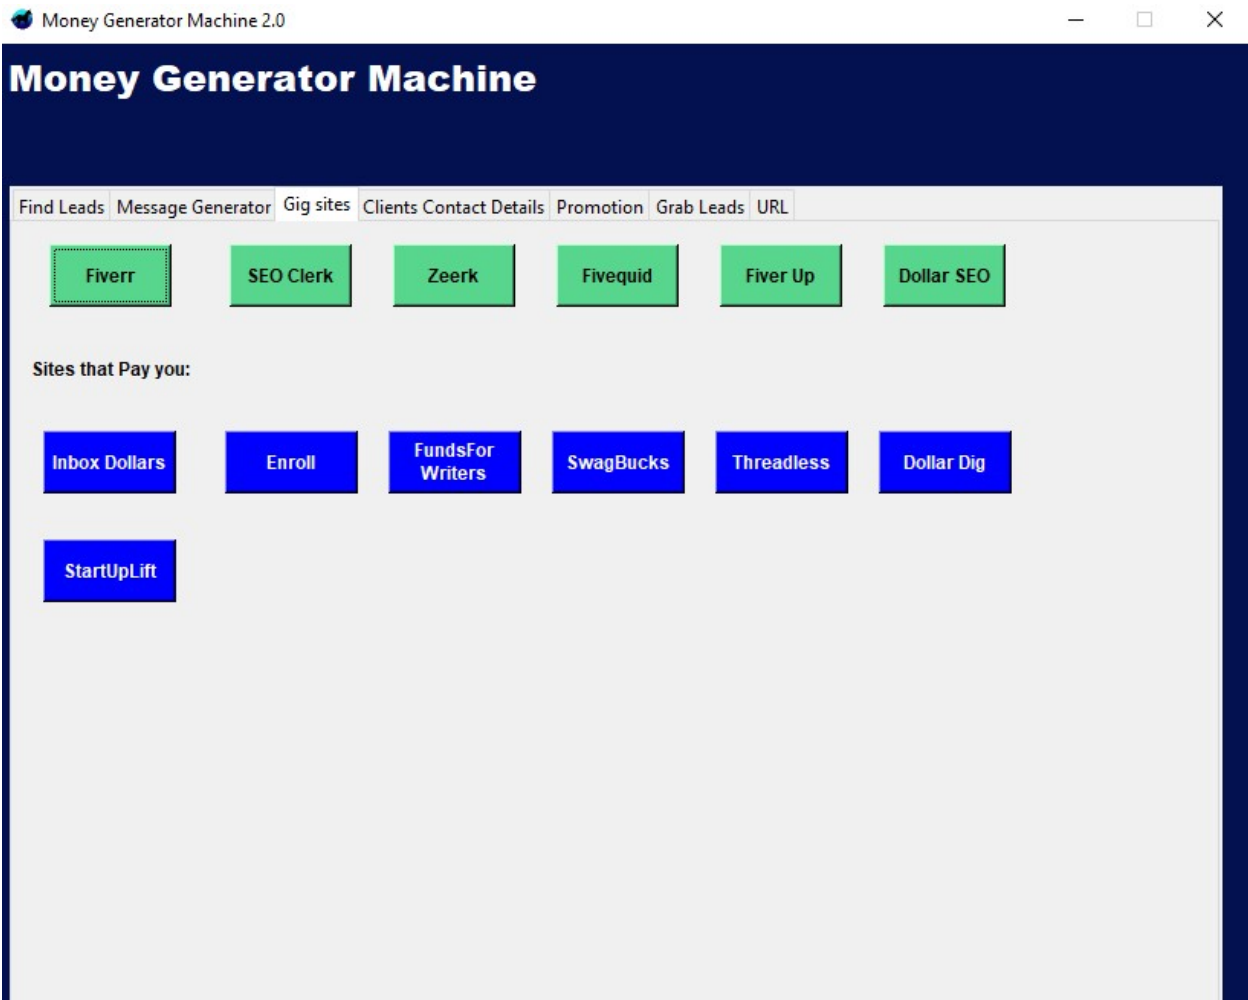

Note: Results will be low for this option.

The second tab is the **Message Generator tab**. You can use the message templates to send messages to your leads. If you keep re-clicking on each **Generate Message button** constantly it will generate a new message randomly. You can click on the **Copy** button to copy each random message to your computer's clipboard and paste into your own emails.

You can also have the option to create your own **message template** by typing it into the box and clicking the **Save** button. The new message will appear in the first **Generate Message** button randomly with the other internal messages.

The third button is where you can **outsource** the work you get from your clients to freelancers. The **green** buttons are the freelancer websites and the **blue** buttons are websites that pay you for doing services online for them.
